

feof

WMPRO, WMMINI FW \geq 1.0 WMMEGA FW \geq 2.0

Test if no more data is available in a file or stream

Description

```
int feof ( int $handle )
```

Return 1 (true) if no more data is available: The pointer is at the end of the file (EOF) or there is no more data pending in the stream's input.

Return 0 (false) if there is more data available: The pointer is not at the end of the file or the stream's input has more pending data.

Parameters

handle: Valid handle of a previously opened resource

Return Value

1 if no data available, 0 if more data available

Example

```
<pre><?
// Read the file index.cgi line by line and format the output for display on
the screen:
$f=fopen("/index.cgi","r"); //open the file for reading and get the file
handle
if ($f) {
    while (!feof($f)) {
        print(htmlspecialchars(fgets($f))."\r\n"); //print the line to the
screen
    }
    fclose($f); //close the file referenced by file handle
} else {
    print("Unable to open file /index.cgi");
}
?></pre>
```

See Also

[fopen\(\)](#) - Open a file for reading or writing

[f485open\(\)](#) - Open the RS-485 port as a stream

[fseropen\(\)](#) - Open the serial port at the specified baud rate with optional parameters

[fsockopen\(\)](#) - Open an internet socket connection with optional timeout

[fread\(\)](#) - Return bytes from a file or stream

[fgets\(\)](#) - Return a single line from a file or stream, with optional size limit

[fclose\(\)](#) - Close a file, stream or socket

[htmlspecialchars\(\)](#) - Convert characters for display in HTML

[if](#) - Flow control structure for conditional execution

[while](#) - Flow control structure for a conditional loop
