

# smtp\_mail

WattmonOS 3.12+

Send an email using a raw socket over SMTP

## Library

```
/lib/uphp/stmp.inc
```

## Description

smtp\_mail ( **string \$to** , **string \$from** , **string \$subject** , **string \$message** , **string \$user** , **string \$password** , **string \$host** , **int \$port** )

This function will send an email using the SMTP Server settings that you pass to the function. You can use port 465 / 587 for SSL/TLS.

## Parameters

**\$to**: Recipient email id

**\$from**: Sender email id

**\$subject**: Email subject

**\$message**: Email message contents

**\$user**: SMTP user id

**\$password**: SMTP password

**\$host**: SMTP Server hostname

**\$port**: SMTP Server port

## Return Values

**int** - 1 if successful or else the SMTP error code
