

smtp_mail

WattmonOS 3.12+

Send an email using a raw socket over SMTP

Library

```
/lib/uphp/stmp.inc
```

Description

smtp_mail (**string** \$to , **string** \$from , **string** \$subject , **string** \$message , **string** \$user , **string** \$password , **string** \$host , **int** \$port)

This function will send an email using the SMTP Server settings that you pass to the function. You can use port 465 / 587 for SSL/TLS.

Parameters

\$to: Recipient email id

\$from: Sender email id

\$subject: Email subject

\$message: Email message contents

\$user: SMTP user id

\$password: SMTP password

\$host: SMTP Server hostname

\$port: SMTP Server port

Return Values

int - 250 if successful or else the SMTP error code
